

SHOWER ENCLOSURE CLEANING AND CARE

To maintain a sparkling clean shower enclosure, minimum but regular cleaning is essential.

- **Remove excess water by squeegeeing shower glass dry after each use.**
- **Clean regularly using a non-abrasive, liquid cleaner formulated for glass and aluminum, or a vinegar solution (1 part vinegar to 5 parts water).**

Do not use abrasive cleaners, bleach, scouring powder or pads which can scratch and damage glass and metal surfaces.
